Why am I unable to display Selzy form on my float funnel page?

Syeda Khadija Phool - 2024-01-29 - FAQs

Problem: Unable to display the Selzy form in a **dialog box**, **Sendpad** form, or in **Custom Code** script.

Reason: It's because the **display** property is set to **"none"** by default in the div tag. For example:

```
<div id="static-form-container" data-url="https://cp.selzy.com/en/v5/subscribe-form/view/68r9dg13sxdp9xeunpbrfwqrf41qkih1i7qjweba" data-settings="6q663o66qdycr7qnau1z1no9ausq8gbb6ept15q9bzayhdtgdd5ho" style="display: none">
```

Workaround:

It's simple, whenever you copy the HTML form code from Selzy and paste it into either the **dialog box**, **SendPad** form script editor, or the **Custom Code** script editor in the float funnel page, you need to set the **display** property to **"block"** in the div tag, and hit **Save.**

For example, the above-shared div tag will then become:

```
<div id="static-form-container" data-url="https://cp.selzy.com/en/v5/subscribe-form/view/68r9dg13sxdp9xeunpbrfwqrf41qkih1i7qjweba" data-settings="6q663o66qdycr7qnau1z1no9ausq8gbb6ept15q9bzayhdtgdd5ho" style="display: block">
```

Embedding Selzy form in Dialog Box
